[about me

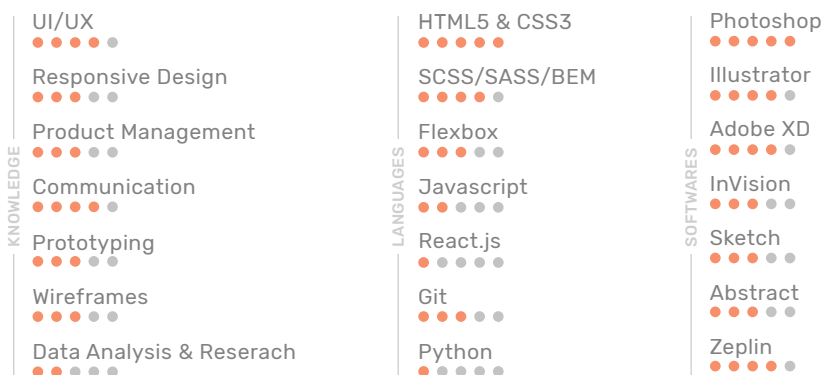

Professional web designer since 2007, working with product and project management, UX/UI design, wireframe, prototype, user research and implementing great user experience.

Graduated in Graphic Design, I've been working with web design for 11 years now, most part of it at some of the most influential ad agencies in Rio. Got into the startup life with Carta, former eShares, on July 2016, on my first work experience abroad as a Product Designer.

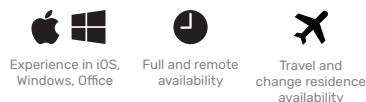

Was an 1 year exchange student (2013 - 2014) in Seoul, South Korea studying Global Media at Soongsil University.

Also, I'm a freelance event producer on my free time. :)
